

## Brow lamination aftercare

After your brow lamination treatment, you should:

- Avoid getting them wet for 48 hours (including steam, saunas, swimming and any other form of moisture)
- Keep them conditioned with an oil / serum to keep them healthy and hydrated
- Brush them daily in the direction / shape you'd like
- Avoid getting them done again before 6 weeks as this can over process the brows and cause them to appear frizzy/curly
- Avoid excess touching or rubbing of the treatment area
- Avoid direct sunlight / sun beds for 48 hours
- Avoid fake tan around the brow area as this can discolour the tint if you've had one
- Avoid applying heavy make up around the area for 24 hours
